Nonresponsive based on revised scope

Region 3 sends Information Requirement letters for potential NPDES violations (MD & PA) – On July 1 and 2, Region 3 sent Information Requirement letters to Horizon Land Management in Crofton, MD and **Nonresponsive based on revised scope** in Charlottesville, VA as part of the NPDES Significant Noncompliance (SNC) National Compliance Initiative. The letters seek information related to effluent limit exceedances. The Information Request for Horizon Land Management focused on three facilities located in Anne Arundel County, MD: Boones Mobile Estate Wastewater Treatment Plant, Maryland Manor Mobile Home Park Wastewater Treatment Plant, and Patuxent Mobile Estates Wastewater Treatment Plant. The letters require a response within 30 days. Both letters were issued under Region 3's off-site compliance monitoring efforts in lieu of on-site inspections. Subsequent on-site inspections may occur if additional information is needed and as the Covid-19 situation allows (J. Brancho 215-814-2087 for Horizon Land Management; S. Maslowski 215-814-2371 for **Nonresponsive based on revised scope**).
